Technical Details

Patio Inowa recessed grip angular symmetrical

- symmetrical central screwing
- with Roto Logo
- screw distance: 43mm
- data drawing 2010062_D

Patio Inowa recessed grip angular asymmetrical

- asymmetrical screwing (article description SAP „ASYM“)
- without Roto Logo
- screw distance: 43mm
- data drawing 2010063_D

Colours:

- R07.2 – traffic white
- R06.2M – jet black
- R01.1 – silver

Use case of asymmetrical recessed grip:

In case the normal recessed grip would result in a collision or overlap with the stop gasket, the asymmetrical recessed grip is used for slim profiles and espagnolettes with small backset. In the Patio Inowa profile check, the recessed grip is checked and a symmetrical or an asymmetrical recessed grip is installed depending on the installation space.

Installation:

The profile must be prepared according to the milling drawings below.

- S21A060-508: milling symmetrical recessed grip
- S21a060-509: milling asymmetrical recessed grip

Availability / Ordering ability

available on stock in Leinfelden at calendar week 22/2023
