### Technical Details

#### English:

From 15 January 2024, the VK22 box will be replaced by the VK25 box. The reason for this change is to optimally utilise the entire volume of the new shipping pallet. Instead of 18 cartons, we will then be able to accommodate 28 in one shipping pallet.

Please find attached a list of the affected articles with the new quantities for the pallet unit (ZMA) The packaging unit ZMI remains unchanged.

Please inform the affected customers and, above all, retailers about the carton change (dimensions) and the consequences in due course:

- The quantity in the carton (internally referred to as ZMI) remains the same
- The dimensions of the carton will change: old 24.5 x 19.5 x 18 cm - new 18.5 x 16.2 x 27.2 cm - this means that the carton will in future be a tall, upright rather than a flat, horizontal carton
- The quantity in the sales pallet (internally referred to as ZMA) will change as shown in the appendix.
- Under certain circumstances, this could lead to an increase in order picking.

# Ecklager Boxes
