Roto Line

The classic handle line

Availability / Ordering ability

Changed items without a new article number will be discontinued in line with stock clearance.

Description

The Rotoline handle 388104 is a raw Roto Line version for external coating by the customer for special colour requirements.

The handle is supplied as a set with all the small parts required to assemble the handle after coating. The set contains pins and screws packed in a plastic bag. The previously pre-assembled grub screw in the handle body is now packaged separately with the other small parts.
