

Product Information

Roto Safe E - ZKS 4in1

Overview

System

Door

Product

Roto Safe E

Electromechanical multipoint
lockings for doors

Availability / Ordering ability

from 03/2024, replaces
896745

Documentation

CTL_86 (next Update)
IMO_438
IMO_506
SUG_43

Description

The following optimisations have been made to the ZKS 4in1:

- New cable between outdoor unit and black box, pluggable on both sides. This simplifies cable routing in the sash and can also be used with cable ducts (wooden doors).
- The sealing frame has been modified for better bonding. As a result, the ZKS 4in1 holds better even with slightly structured profile surfaces.
- The design and routing dimensions remain the same, the documentation (IMOs) remains unchanged.
