Roto NX

The Tilt&Turn hardware system for windows and balcony doors shaping the industry once again

Availability / Ordering ability

All items listed can be ordered when the product information is published.

Documentation

Roto NX catalogues CTL 104 and CTL 105 as well as the installation instructions IMO 455 and IMO 456

Description

For windows with small sash rebate heights and windows with low handle seats, espagnolettes with pre-assembled turn/tilt corner drives are required, as the standard coupling point of the constant Roto NX KSR espagnolettes cannot be realised due to the space available.

As part of the conversion of the hardware portfolio from Roto NT constant to Roto NX KSR, various espagnolette sizes were revised and fitted with a pre-assembled corner drive. The corresponding articles are collected in this PI and supplemented as required.
