Product
Roto NX

The Tilt&Turn hardware system for windows and balcony doors shaping the industry once again

Availability / Ordering ability
June 2024

Description

Image description:

Old version above: Compression spring had to be lifted to decouple
New version below: Button must be pressed to decouple

Technical information:

The mounting/unmounting of the items below has been revised.
A spring plate no longer has to be laboriously lifted, but the safety device is now pressed with the fingertip and released (see picture).

The sash weight for tilt sashes with restrictor and cleaning stay has increased from 60 to 80 kg.

Restrictor and cleaning stay are recommended for tilt-only window; They are required for fanlight (according to RAL RG 607 / 12).

The sash rebate dimensions are unchanged.

The new items cannot be combined with the components of the previous version!
