

Product Information

## Run-up block for faceplate mounting for TSL espagnolettes

### Overview

**System**  
Window

**Product**  
Roto TSL

Security locking for outward  
opening windows

**Availability / Ordering  
ability**

### Description

- Installation on the screw position between the locking cams, so the run-up block always runs in over the striker
- **Requires a cam length of 10.5 mm,**
- The rebate clearance and striker height must be checked
- By lifting the sash when closing, the required rebate clearance is maintained to ensure secure locking of the cams
- Prevents the sash from sagging when opening
- Lifting the sash when closing
