Description

Packaging change for corner hinges, corner bearings, and security striker from VK22 to VK25

Technical details: Effective July 1, 2025, the VK22 carton will be replaced by the VK25 carton. The reason for this change is to optimally utilize the entire volume of the new shipping pallet. Instead of 18 cartons, 28 cartons can then be accommodated in one shipping pallet.

Attached is a list of the affected items with the new quantities for the pallet unit (ZMA).

Please inform affected customers, and especially retailers, about the carton change (dimensions) and the consequences in due course:

The quantity in the carton (internally referred to as ZMI) will also be partially changed; see attachment.

The dimensions of the box will change: old 24.5 x 19.5 x 18 cm - new 18.5 x 16.2 x 27.2 cm - this means that in the future, the box will be a tall, upright box rather than a flat, lying box.

The quantity in the sales pallet (internally referred to as ZMA) will change as shown in the appendix.

This could potentially lead to an increase in order picking.
