COA_34

Description

Uncoated cover sleeves for the three-part butt hinges 318 P and 322 P have been created to complete the range.

The cover sleeve set includes two frame hinge cover sleeves and one cover sleeve for the sash hinge.

Optionally, the sash hinge cover sleeve extended on one side can be combined with this. The extended side completely covers the side adjustment mechanism on the sash hinge.

Please note:

- When using the extended sash hinge cover sleeve, the side adjustment towards the hinge is reduced!
- Side adjustment with extended cover sleeve: +3 / -2 mm

The COA_34 coating instructions must be observed for coating:

- Coating instructions in German: [Roto Solid B | 218 P, 222 P, 318 P & 322 P](#)
- Coating instructions English: [Roto Solid B | 218 P, 222 P, 318 P & 322 P](#)
